Weekly Homework Schedule Template

Elementary edition (K–5) — blank grid on this page, filled-in examples on page 2. Print, post where homework happens, and let your child hold the pencil.

Blank Weekly Grid

Day	Homework time	Subject focus	Points earned	Done
Mon				☐
Tue				☐
Wed				☐
Thu				☐
Fri				☐
Sat / Sun				☐

Column rules: “Homework time” is the START time, never a duration — the session ends when the list is done. “Done” is checked by the child, never the parent. Points stay flat and boring.

Daily View (one tough day, block by block)

Block	What happens	Points	Done
Snack + reset		—	☐
Session 1 — hardest subject			☐
Movement break		—	☐
Session 2 — rest of the list			☐
Pack the bag (before bed)			☐

Use the daily view for the days that keep collapsing: the hardest subject goes first, while the tank is full, and the backpack gets packed at bedtime — never at 7:40 a.m.
